

# LX

MULTI-SIDED GAS SERIES

RADIANT WARMTH  
FROM EVERY ANGLE.

 **valor**

# THE SCIENCE OF WARMTH™

We pioneered and continue to improve our radiant heat technology that generates a constant, comfortable warmth in your home.

## RADIANT HEAT

We put radiant heat into every fire, the most comfortable warmth we know. You can feel it.

## REALISTIC LOGS

High definition, low mass fiber ceramic logs heat up and glow quickly, radiating warmth.

## SAFETY

Our fires are put through rigorous safety testing in our in-house CSA approved lab.

## HEATSHIFT™

Select the finish you want, knowing that your artwork, TV and construction materials stay cooler and protected.

Proudly made  
in North America

### CONVECTIVE HEAT

Convective heat is the secondary heat our fireplaces produce—without a fan.

### ENHANCED FLAME

Our new V-Class burners create realistic, soothing flames and ambient glowing embers that radiate heat better than ever.

### ADJUSTABLE HEAT

New Valor 10 remote control adjusts flame for constant, even warmth without having to cycle the fire on and off.

### ALUMINIZED STEEL

High temperature aluminized steel firebox delivers efficient warmth, preventing rust and wear.

### EFFICIENCY

Radiant heat and zone heating technology are up to 30% more efficient than central forced air systems.

### CERAMIC GLASS

Durable and robust ceramic glass improves radiant performance.

Please Note: Printed images may vary from actual product. All product information is accurate at time of printing and is subject to change. For more visit [valorfireplaces.com](http://valorfireplaces.com)

## LEX SERIES

Select from three multi-sided styles of this designer series. The two and three-sided fireplaces are efficient heaters that produce a luxurious amount of radiant heat, paired with the convective heat you'll enjoy with the HeatShift system every LX employs.

### LX2 3-SIDED

Creates a strong central point in a living or great room. Everyone will enjoy the 180° viewing area.

— L 45½"  
■ D 14"  
H 17"

## 1 MODELS

Consider the size and shape of your spaces when choosing your fireplace. The following measurements give you an idea of the viewable area when installed.

To find out more, click the QR codes above or visit [valorfireplaces.com](http://valorfireplaces.com)

## LX2 CORNER L/R

Great for asymmetrical living spaces: wraps around corners and transitions between two rooms.

L 45½"  
 D 14"  
 H 17"

## LX1 3-SIDED PIER

Fits smaller rooms and defines open spaces, making two spaces out of one.

L 31⅞"  
 D 18½"  
 H 17"

## 2 FIRE BEDS

Select a fire bed that suits your decor and personal style. Which firebed will you enjoy most? Consider how the logs and other fire beds appear when the fire is on and when it's off—for example, in the summer.

### 3 LINERS

Selecting a liner is an important choice, particularly in the LX2 fireplaces where the liner features prominently.

Visit a Valor dealer to see a sample in person or design your own at [design.valorfireplaces.com](http://design.valorfireplaces.com)

#### FLUTED BLACK

Provides a graphic contrast, defining the lighter fuel bed and fire.

### REFLECTIVE BLACK GLASS

High definition glass contrasts and enhances the appearance of the firebed and flames.

## ZONE HEATING

Looking to heat other areas in your home? HeatShift's optional Remote Blower helps manage your heat effectively by distributing warmth to other areas of your home—such as bedrooms, hallways or utility rooms.

HEATSHIFT CANOPY (PONY WALL) 2100HSC

## **4** HEATSHIFT™

### KEEPS WALL COOLER

Pioneered by Valor, our unique HeatShift System naturally circulates up to 125 cubic feet of convective heat per minute through hidden ducts and back into the room—avoiding surface areas above the fireplace.

### DESIGN FLEXIBILITY

Run standard finishing materials right up to the fireplace surround, including drywall, wood, tile and stone. Install mantels lower than usual at a one-to-one ratio of depth to height from the fireplace surround.

### IMPROVES PERFORMANCE

Harnessing convective warmth, up to 60% of fireplace heat rises and flows through HeatShift and back into the room. The remaining radiant heat emanates from the fireplace, keeping you warm.

### NO ELECTRICITY REQUIRED

Heatshift circulates heat naturally using gravity and Valor product ingenuity—no need for a fan or electricity. No power—no problem.

### CONSTRUCTION MADE EASY

Unlike many competing products, Valor fully ducts HeatShift for clean, safe air quality. HeatShift is built and designed in North America for North American homes, meeting building code requirements.

The LX1's HeatShift canopy (shown here) allows you to build a pony wall that separates two rooms without blocking sight lines—and keeps surface areas cooler. To find out more, visit [valorfireplaces.com/heatshift](http://valorfireplaces.com/heatshift)

### SMARTPHONE COMPATIBLE

Want to control your fireplace with your smart device?

Our Valor 10 App. is available this year for download and is compatible with the Valor 10 Remote control.

Accurately knows the current ambient temperature of your room.

Child Proof your remote for safety and ease.

Set the temperature for specific times of the day.

Set the timer to turn the fireplace off up to 9 hours ahead.

Turn your fireplace lights on and off.

Program your fireplace to turn on and off when you want at the temperature you want.

## 5 REMOTE CONTROL

### VALOR 10 REMOTE CONTROL

Standard throughout the LX Series, Valor's interactive remote control has up-to-the-moment information on the state of your fireplace, such as room temperature, and other customizable settings.

### VALOR 10 APP

The remote pairs with the Valor 10 App so you can control your LX fireplace with your smartphone.

## LX2 STEEL FRAMING KIT

## LX1 STEEL FRAMING KIT

# 6 FRAMING

### STEEL FRAMING KIT

When you decide to install your custom LX model, consider our optional steel framing kit. Easy to set up, the kits take the guesswork out of framing your new fireplace—builders, architects and designers appreciate them too.

## EFFICIENCY

### RATINGS

At Valor we use recognized Canadian and US government testing methods to determine our energy efficiencies, and ensure our products perform in your home as rated.

### EFFICIENCY

Radiant heat and zone heating technology are up to 30% more efficient than central forced air systems.

Model	Max. Input	Min. Input	Max. Output*	EnerGuide*
2200NG	36,000	19,000	26,028	67.4%
2200LP	36,000	21,000	26,028	67.4%
